

Welcome to [RobCrowther's WackoWiki](#) site, a free-form web-based collaboration tool. To get started create a user id (click on [User Settings](#) ), you can then create your own home page.

This page owes it's inspiration to [Brucey's WikiWeb](#).

If you have trouble formatting wiki documents try my [Word 2 Wacko](#) converter, converts basic MS Word text into Wacko ready markup.

If you use Fedora Core 3 and commonly edit PHP files you might want to try [gPHPEdit](#), I built an [FC3 RPM for it](#) because there wasn't one available for download at the site.
